

APP TO THE FUTURE is a competition where Core77 & Windows Phone teamed up to challenge the international design community to create apps for Windows Phone. It was a showcase on how to create, connect, and simply impress the pants off our future selves.

Shown here are a few of the winners and honorable mentions from the competition:

fitCHAMP

A social fitness app where you can track results and compete with your friends through certain metrics like distance moved, steps taken, and calories burned.

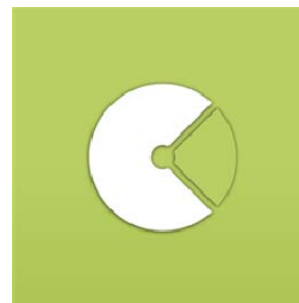

FREE HOURS

Free Hours helps you find all of your free time for the current day and the next day based on your calendars.

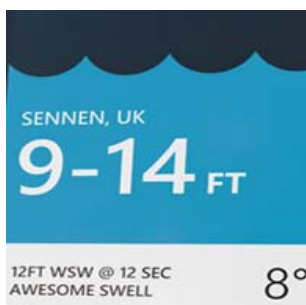

HappyAppy

A smile is contagious! This app allows people to virtually connect in a physical and emotional way that is not currently possible.

Slice

Slice is an app that splits bills between people and keeps track of them, thus avoiding endless headaches.

Tide

A Surfing forecast app that creates a better way of exploring the waves in real time by accessing data that is most important to surfers.

MyOwnWay

MyOwnWay is for urban explorers who would much rather take the interesting side alley than follow the most direct route to their destination!

Dear Diary

Dear Diary provides all the journaling tools you need with complete privacy of your own.

Secure Me

SecureMe app monitors surroundings for unusual noises and erratic movements (using accelerometer movements) to identify panic situations.
